

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Title: IMPROVED TWIN TRACK WIRE LATH
Application No.: 10/663,419
Filing Date: 09/16/2003
Inventor: SACKS, Abraham et al.
Group Art Unit: 3635
Examiner: HORTON, Yvonne Michele
Attorney Docket No: 050601
Date: 02/26/2007

To: Commissioner for Patents, USPTO
P.O. Box 1450, Alexandria VA 22313-1450

Dear Examiner Horton:

This is in response to your non-final office action dated 02/09/2007. In this document we have implemented changes that you suggested to place the application in condition of allowance.

This document includes responses and amendments to the following:

Objections to Specification: Page 2

Claim Rejections USC 102, 103: Page 4

Claim Appendix: Page 5

Objections to Specification

In the latest office action dated 02/09/2007 the examiner made the following statement.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: there is no support in the specification for the dimensions and detailed in claims 4-6 and 9-11. More in particular, page 9 of the specification details that the degrees between furrs is 45; however, there is no mention of a range of 20-50 or 40-50 degrees. Correction is required.

The examiner refers to issues that she has already brought up in her office action of 06/07/2004 and which have already be corrected in our response of 10/25/2004 shown on the next page:
